Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

Claim 26: A computer-readable medium that is a physical memory storage device, the computer-readable medium including a common data stream comprising:

a plurality of secure blocks encoded from a source stream, said plurality of secure blocks encrypted, using each of a plurality of keys, for each of a plurality of classes of destination systems, each key being associated with a corresponding class of destination systems, thereby forming a plurality of encrypted versions of secure blocks, such that each encrypted version of secured blocks is decryptable by only those destination systems that are in the corresponding class; and

a plurality of unsecured blocks encoded from said source stream.
